

16th Annual HIV in West Virginia

April 24, 2020

Target Audience: The intended audience for this conference are physicians, physician assistants, nurse practitioners, advance practice nurses, social work and ancillary team members. **For those not listed, please check with your licensing agency for credit approval.*

Conference Description: Welcome to the Sixteenth Annual HIV in West Virginia Conference. Your host is the MidAtlantic AIDS Education and Training Centers: WV Regional Partner. This conference intends to inform medical providers of vulnerable counties in West Virginia regarding the rapid transmission of HIV and other infectious diseases, importance of identifying people with HIV, discussions of the AIDS Crisis of the past and Intimate Partner Violence. Also, included will be faculty discussing issues surrounding the opioid epidemic.

Once again, this conference offers WV healthcare professionals the opportunity to link with currently funded Ryan White HIV care providers as well as other HIV specific agencies across the state. The yearly goals of this conference are to enhance health care providers' knowledge base regarding the provision of health care for those with HIV and to augment improved patient outcomes for the HIV positive individual.

Objectives: *At the end of this program, participants should be able to:*

1. Discuss the key findings and data outcomes of the WV Vulnerability studies and the relationship to new HIV cases and opioid deaths.
2. Identify the various evidence-based models and methods for the identification of new HIV cases in persons with undiagnosed HIV.
3. Discuss how intimate partner violence emerged as a significant impediment of the prevention and treatment of HIV.
4. Assess and debrief the outcomes of the lunch time conference participant discussion on HIV testing, PrEP and harm reduction as HIV prevention and HIV related stigma in the clinical setting.
5. Discuss the importance of involving current users and those in recovery in designing of HIV prevention models.
6. Explain the socio-economic factors that have contributed to the erupting epidemic of addiction in rural communities.

Agenda:
