

19th Annual HIV in WV Conference

Friday May 19, 2023

Stonewall Resort. Roanoke, WV

Target Audience: The intended audience for this conference is physicians, physician assistants, nurse practitioners, advance practice nurses, social work and ancillary team members. **For those not listed, please check with your licensing agency for credit approval.*

Conference description: Welcome to the Nineteenth Annual HIV in West Virginia Conference. Once again, this conference offers WV healthcare professionals the opportunity to link with currently funded Ryan White HIV care providers and other HIV specific agencies across the state. The yearly goals of this conference are to enhance health care providers' knowledge base regarding the provision of health care for those living with HIV and to augment improved patient outcomes for the HIV positive individual.

We are pleased to provide you with expert content and speakers on a subject that touches each and every one of us. This year's conference is primarily focused on substance use disorder (SUD) and HIV prevention. We are excited for you to join us for the day!

Objectives: *At the end of this program, participants should be able to:*

1. Describe community impact related to an HIV outbreak and discuss how resources and opportunities available to communities impact the health, prosperity, and wellbeing of the people living there.
2. Identify the connection between Substance Use Disorder and risk for HIV and discuss the challenges practitioners face.
3. Discuss a Medication Assisted Treatment program and how it applies to HIV prevention and treatment adherence; identify potential drug interactions and discuss the importance of treatment referrals.
4. Describe benefits of introducing Substance Use Care and treatment into practice, identify resources and define essential elements to bring about successful clinic practice change.
5. Describe considerations as to why Nurse-led Pre-exposure Prophylaxis (PrEP) is beneficial in having an impact on HIV transmission and reduction of new infections, and discuss value of Nurse-led PrEP implementation in addressing lack of access to PrEP.
6. Describe steps for HIV Laboratory Certification in WV; discuss different types of rapid HIV tests and the benefits of point of care testing in both clinical and non-clinical sites
