

Older Adult Clients:

HRSA's Ryan White HIV/AIDS Program, 2020

Population Fact Sheet | July 2022

The Health Resources and Services Administration's Ryan White HIV/AIDS Program (RWHAP) provides a comprehensive system of HIV primary medical care, medications, and essential support services for low-income people with HIV. More than half the people with diagnosed HIV in the United States—nearly 562,000 people in 2020—receive services through RWHAP each year. The RWHAP funds grants to states, cities, counties, and local community-based organizations to provide care and treatment services to people with HIV to improve health outcomes and reduce HIV transmission. For more than three decades, RWHAP has worked to increase health equity, stop HIV stigma, and reduce health disparities by caring for the whole person and addressing their social determinants of health.

RWHAP clients are aging. Of the more than half a million clients served by RWHAP, 47.9 percent are people aged 50 years and older. Learn more about these clients served by the RWHAP:

- **The majority of RWHAP clients aged 50 years and older are from diverse populations.** Among RWHAP clients aged 50 years and older, 68.0 percent are people from racial and ethnic minorities; 44.2 percent of RWHAP clients in this age group are Black/African American people, which is slightly lower than the national RWHAP average (46.6 percent). Additionally, 21.2 percent of RWHAP clients in this age group are Hispanic/Latino people, which is slightly lower than the national RWHAP average (23.6 percent).
- **The majority of RWHAP clients aged 50 years and older are male.** Data show approximately 70.8 percent of clients aged 50 years and older are male, 28.1 percent are female, and 1.1 percent are transgender.
- **The majority of RWHAP clients aged 50 years and older are people with lower incomes.** Among RWHAP clients aged 50 years and older, 59.2 percent are living at or below 100 percent of the federal poverty level, which is lower than the national RWHAP average (60.9 percent).
- **Data show 3.6 percent of RWHAP clients aged 50 years and older experience unstable housing.** This percentage is lower than the national RWHAP average (4.8 percent).

Medical care and treatment improve health outcomes and decrease the risk of HIV transmission. People with HIV who take HIV medication as prescribed and reach and maintain viral suppression cannot sexually transmit the virus to their partner. In 2020, 92.9 percent of clients aged 50 years and older receiving RWHAP HIV medical care are virally suppressed,* which is higher than the national RWHAP average (89.4 percent).

*Viral suppression is defined as a viral load result of less than 200 copies/mL at most recent test, among people with HIV who had at least one outpatient ambulatory health services visit and one viral load test during the measurement year.
